PROFESSIONAL SUMMARY

Azure DevOps Engineer with 2 years of enterprise production experience designing and maintaining CI/CD pipelines, automating Azure cloud infrastructure using ARM Templates, Bicep, and Terraform, and integrating DevSecOps practices across the full software delivery lifecycle. AZ-900 certified. Currently working on a Microsoft project engagement (Nov 2024 – Present).

Delivered a measurable 30% reduction in cloud infrastructure failures through systematic root cause analysis and permanent automation fixes — recognised with the Above and Beyond Award at Quadrant Technologies (Sep 2025). Proven ability to collaborate with development, QA, security, and operations teams to improve deployment reliability and platform stability.

Available to join within 15 days. Open to any location in India.

CORE COMPETENCIES

Azure DevOps & CI/CD: YAML Pipelines, Multi-stage Pipelines, Service Connections, Repos, Boards, Artifacts, Release Management, Git

Infrastructure as Code: ARM Templates, Bicep, Terraform — automated, auditable Azure resource provisioning

Azure Cloud: App Services, AKS, VMSS, Storage, Key Vault, Networking, Microsoft Entra ID, Azure Functions

DevSecOps & Security: RBAC, Managed Identities, NSGs, Azure Policies, Key Vault, Microsoft Purview, Security Gates

Monitoring & Observability: Azure Monitor, Log Analytics, KQL, Application Insights, Alerting, Power BI Dashboards

Scripting & Automation: PowerShell, Python, Bash, Azure CLI, Linux (Ubuntu), Git — production-grade operational automation

Containers: Docker, Kubernetes, Azure Kubernetes Service (AKS), Helm

SRE & Operations: SLO/SLA, Incident Response, RCA, Blameless Postmortems, On-call, Runbooks, Documentation

PROFESSIONAL EXPERIENCE

Quadrant Technologies Pvt Ltd | Jun 2024 – Present • 2 Years

Career progression: Cloud & DevOps Intern → Software Trainee → Azure DevOps Engineer

► Azure DevOps Engineer

Nov 2025 – Present • Microsoft Project Engagement

- **Designed and maintained enterprise-grade CI/CD pipelines** — multi-stage YAML pipelines supporting multiple applications and services across Dev, QA, UAT, and Production — with PR triggers, approval gates, service connections, and rollback strategies — improving deployment reliability and release velocity across cross-functional teams.
- **Delivered 30% reduction in cloud infrastructure failures** through systematic root cause analysis, proactive Azure Monitor and KQL monitoring, and permanent automation fixes — recognised with the Above and Beyond Award (Sep 2025).
- **Managed Azure cloud infrastructure using IaC** — ARM Templates, Bicep, and Terraform for repeatable provisioning of App Services, AKS, VMSS, Key Vault, VNets, and NSGs — maintaining all infrastructure under version control.

- **Implemented DevSecOps across all pipelines and environments** — enforcing RBAC, Managed Identities, Key Vault secrets injection, Azure Policies, and NSG configurations — embedding security at every stage of build and release.
- **Built observability and monitoring solutions** — Azure Monitor alerts, Log Analytics KQL queries, Application Insights dashboards, and Power BI operational reports — enabling proactive incident detection and SLO tracking.
- **Automated operational tasks using PowerShell, Python, and Bash** — bulk infrastructure remediation, VMSS updates, storage hardening, and deployment automation — significantly reducing manual toil across enterprise cloud environments.

► Software Trainee

Nov 2024 – Oct 2025

- **Built enterprise observability pipelines** using KQL queries mapping Azure DevOps service ownership to infrastructure data — reducing mean time to identify and resolve production incidents.
- **Strengthened DevSecOps governance via Microsoft Purview** — replacing manual security reviews with policy-driven automated controls across all Azure environments — improving compliance posture and reducing audit preparation time.
- **Created real-time Power BI dashboards with DAX measures** — giving engineering and leadership teams live visibility into deployment KPIs, infrastructure health, and cost metrics.

► **Cloud & DevOps Intern** (Jul – Oct 2024) — Azure Fundamentals training, hands-on work on VMs, storage, and networking. Contributed to CI/CD pipeline setup and IaC using ARM Templates and YAML.

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence & Machine Learning

2020 – 2024

Balaji Institute of Technology and Science, Warangal, India

CERTIFICATIONS & RECOGNITION

- **Microsoft Certified: Azure Fundamentals (AZ-900)** — Microsoft | [Verify Credential](#) 
- **Above and Beyond Award** — Quadrant Technologies (Sep 2025) | Recognised for exceptional performance, CI/CD reliability improvements, and measurable cloud infrastructure stability in production.
