SUMMARY

Azure DevOps Engineer with 2 years of production experience. AZ-900 certified.

Reduced cloud infrastructure failures by 30% through root cause analysis and permanent remediation.

Experienced in CI/CD pipeline management, DevSecOps, incident management, SLA/SLO adherence, and on-call support.

Hands-on with Azure PaaS services, Infrastructure as Code using ARM Templates, PowerShell and Python automation, Key Vault integration, RBAC, and end-to-end incident resolution in production environments.

Seeking Azure DevOps Engineer, Cloud Engineer, or DevOps Engineer roles where reliability, automation, and security ownership matter.

SKILLS

CI/CD & Azure DevOps: Azure DevOps, YAML Pipelines, Classic Pipelines, Multi-stage Pipelines, Release Management, Git

Site Reliability: Incident Management, On-call Support, SLA/SLO Management, Root Cause Analysis, Runbooks, SOPs

Infrastructure as Code: ARM Templates, Bicep (Basic), Terraform (Basic)

Azure Platform: Azure App Services, Azure Functions, Storage Accounts, VMSS, Microsoft Entra ID, Azure Data Factory

Monitoring & Observability: Azure Monitor, Log Analytics, KQL, Application Insights, Power BI

Security & Compliance: Key Vault, RBAC, NSGs, Managed Identities, Azure Policies, Microsoft Purview, DevSecOps

Scripting & Automation: PowerShell, Azure CLI, Python, Bash, Linux (Basic)

Containers: Docker (Basic), Kubernetes (Basic), Azure Kubernetes Service (Basic)

WORK EXPERIENCE

Quadrant Technologies Pvt Ltd | Jun 2024 – Present (2 Years)

Career progression: Intern → Software Trainee → Azure DevOps Engineer

► Azure DevOps Engineer

Nov 2025 – Present

- **Reduced cloud infrastructure failures by 30%** through systematic root cause analysis and permanent remediation of critical KPIs — Safe Secrets, VMSS Auto Image Patching, and Hard-Coded Endpoints — across Azure environments.
- **Managed and improved CI/CD pipelines across 5-10 environments** — troubleshooting failed builds, resolving Key Vault integration failures, fixing variable expansion errors, and managing deployments across Dev, QA, UAT, and Prod with zero downtime.
- **Automated cloud infrastructure operations with PowerShell and Azure CLI** — bulk remediation via CSV, Shared Key and Local Auth disabling, Soft Delete enablement, and VMSS image updates — cutting hours of manual operational effort per release cycle.
- **Managed production incidents end-to-end as part of on-call support** — triaging, investigating, and resolving issues across Storage Accounts, VMSS, Managed Identities, Key Vault, and Azure Policies — maintaining SLA adherence and producing full RCA documentation.
- **Implemented DevSecOps practices across all environments** — enforcing RBAC, Key Vault-backed secrets, NSG configurations, Managed Identities, and Azure Policies to ensure security compliance on every deployment.

- **Managed sovereign cloud operations (Bleu France Central)** following release governance with complete rollback readiness, post-deployment verification, and SOP documentation on every release.
- **Trained new engineers on Azure DevOps workflows**, KPI lifecycle management, and deployment processes — reducing ramp-up time and improving team-wide operational consistency.

► **Software Trainee**

Oct 2024 – Nov 2025

- **Improved service ownership visibility and incident tracking** by building cross-cluster KQL functions that mapped Azure DevOps data to service metadata, reducing time to identify responsible teams during production issues.
- **Strengthened security monitoring and compliance posture** by delivering automated compliance solutions via Microsoft Purview integration, replacing manual checks with policy-driven automated controls.
- **Built real-time operational dashboards in Power BI** with custom DAX measures, replacing manual KPI reporting and giving teams instant visibility into infrastructure and deployment health.
- **Developed reusable Azure Logic Apps KQL functions** to streamline data operations and improve cross-team data visibility across Azure DevOps environments.

► **Cloud & DevOps Intern** (Jun – Oct 2024) — Completed Azure Fundamentals training with hands-on work on virtual machines, cloud storage, and networking. Contributed to CI/CD pipeline setup and Infrastructure as Code implementation using ARM Templates and YAML configurations.

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence & Machine Learning

2020 – 2024

Balaji Institute of Technology and Science, Warangal, India

CERTIFICATIONS & AWARDS

- **Microsoft Certified: Azure Fundamentals (AZ-900)** — [View Credential](#)
- **Above and Beyond Award** — Recognized for exceptional performance and dedication, Quadrant Technologies (Sep 2025)
